RAMRODZ® INC. IS DEDICATED TO MANUFACTURING FIRST-TIME, UNIQUE AND INNOVATIVE GUN CLEANING PRODUCTS

As gun owners, we knew the pitfalls of old gun cleaning methods first-hand, so we set out to create a better, faster and more efficient way to clean our guns. It had to hold up to the rigors of gun cleaning - it needed to be strong, absorbent, and precise to fit perfectly into a barrel, but versatile enough to use on all parts. The result was so great that we launched RamRodz® Inc., a company dedicated to providing a superior gun cleaning system that would change the market.

RAMRODZ® Barrel and Breech Cleaners are a new line of precision gun cleaning swabs that eliminate the need for cotton patches. They provide far superior gun cleaning performance in a fraction of the time without the hassle and mess. All RamRodz® models are ideal for cleaning barrels, receivers, slides, chambers, magazine housings, breeches and more.

**Tips range
in size from
.22 Caliber to
12 Gauge**

The flexible 8", bamboo handles on pistol models are specially engineered to easily withstand the rigors of reaching into tight areas. The 3" bamboo handles for rifle and shotgun models are designed to be inserted into the included adapters that connect to RamRodz® Bore Cables and standard cleaning rods for long-barrel cleaning.

CUSTOM-MOLDED

LOW-LINT COTTON

EXTREME FLEX

RAMRODZ®

No Drip, Mess or Splatter

Penetrates, Lubricates and Protects

RAMRODZ® feature industrial-strength cotton heads that conform to barrel walls, removing dirt and debris that patches, snakes and brushes leave behind! The density of the low-lint cotton soaks up cleaning solvent without any drip or splatter, releasing only when pressure is applied. This ensures a more efficient cleaning method and a cleaner work environment.

RAMRODZ® provides a complete cleaning system: precision bore cleaners, non-toxic two-stage cleaning solution and lubricant, as well as specialized tools for accessing hard-to-reach areas and gunsmithing.

Use RamRodZ® Bore Cable with Patented RamRodZ® Adapters

**RAMRODZ® truly is...
A REVOLUTIONARY
GUN CLEANING
SYSTEM.**

HOW TO USE RAMRODZ® GUN CLEANING PRODUCTS

RAMRODZ® provides a complete system to clean your gun from start to finish. Even if you think your gun is clean, we guarantee our caliber-specific swabs will find more dirt and residue in your barrel. Take the RamRodz® Challenge and clean your gun with your preferred method, then run a caliber-specific RamRodz® down the barrel to see what was left behind.

WARNING! Always unload firearms before cleaning them!

RamRodz® are simple to use. Once your gun is disassembled, use RamRodz® caliber-specific swabs and brushes to thoroughly clean the barrel of your gun. For best results, clean in the direction of the bullet path. Soak the swabs in RamRodz® Cleaning Solution to destroy hydrocarbons, lead and copper left in the barrel.

Use a RamRodz® Bore Cable or Push Rod with adapters to clean long guns. They can also be used with RamRodz® Bore Brushes to scour the inside of your barrel before you run a swab down it. You can even leave a solution-soaked swab in the barrel overnight to help remove persistent carbon fouling.

RamRodz® precision tools, swabs and accessories can be used to detail clean all internal and external gun parts, including receivers, slide rails, bolt carriers, chambers, magazine houses, breeches and more. The Portable Work Tray and Hypalon Cleaning Mat help keep your work area protected while you clean.

#70035 PROFESSIONAL GUN CLEANING MASTER KIT

A COMPLETE SYSTEM

RAMRODZ® offers the most comprehensive, patchless, precision detailing kit on the market to clean your entire gun, inside and out.
